

Mentor Guide (Winter of Code Social)

Introduction

Welcome to Winter of Code Social (WOCS)!

As a Mentor, your role is to guide contributors, review their pull requests, and help them grow through hands-on learning. You'll also assist Project Admins in managing repositories, resolving doubts, and ensuring fair evaluation of contributions.

This guide will help you:

- ✓ Understand your responsibilities
- ✓ Review PRs and assign levels correctly
- ✓ Communicate effectively with contributors
- ✓ Stay aligned with the event schedule

Kick-Off Meeting

The Kick-Off Meeting was held on November 1. If you couldn't attend live, you can watch the recording for a complete walkthrough of how Winter of Code Social works, the points system, leaderboard demo, and mentor expectations.

Your Role as a Mentor

As a mentor, you are helping contributors learn and succeed while maintaining project quality. Here's what you should do:

1. **Be Available**
Join the Discord Server and introduce yourself in the #introduction channel. This is where you'll interact with contributors, admins, and the team. Try to give at least 2 hours of your time per week as a mentor to help Project admins and contributors.
2. **Support Contributors**
Guide contributors through issue selection and resolving challenges. Help them understand the project setup, structure, and best practices.
3. **Review Pull Requests**
Review PRs for code quality, accuracy, and adherence to contribution guidelines. Provide constructive feedback when changes are needed.

4. **Assign PR Levels**

Each PR must have 'wocs' and one of these levels before merging:

- Level 1: 2 points
- Level 2: 5 points
- Level 3: 11 points

Be fair and consistent while assigning levels. **Once merged, the level cannot be changed.** Make sure the correct label (level 1, level 2, or level 3) is added before merging. Labels must be lowercase and have a single space. Incorrect labels will not be counted for points.

5. **Coordinate with Admins**

Admins manage repository setup and webhooks. Work with them to ensure your project is organized, issues are labeled, and contributors' PRs are tracked properly.

6. **Encourage Participation**

Motivate contributors to stay active, ask questions, and explore higher-level tasks. Remind them that learning and consistency matter more than perfection.

Leaderboard and Points

The leaderboard automatically updates based on merged PRs. Points are calculated only if:

- The repository webhook is connected
- The PR is merged with the correct label
- The contributor is registered on the WOCS website

Leaderboard: <https://woc.codesocial.tech/leaderboard>

The leaderboard will be available from November 10 onwards.

Communication

All updates, event notices, and queries are handled via email and on the Discord server. Please check it regularly and stay responsive to your assigned contributors.

Support

If you face any issues or need help, you can:

- Ask in the #help channel on Discord
- Tag @Team | Arushi or @Team | Rizwan for guidance
- Or [send us an email](#)

Here's the doc to see which Project you're assigned to:  Assigned Mentors

- Please note that all Mentors haven't been assigned yet. If you need to change the project you're working on, reach out to us.
- All Mentors must submit their GitHub accounts ASAP.
- All other Project Admins requested to be Mentors on their own Projects.
